Genetic testing Leonberger Polyneuropathy LPN1

You have contributed samples to our research project . We applied a recently developed DNA test that allows the unequivocal diagnosis of LPN1 carriers. Further details are given on the information sheet at our web site

http://www.genetics.unibe.ch/content/service/dog/index_eng.html

Lab ID	Dog	Kennel	Breeding ID	Sex	DOB	LPN1 genotype
LB825	Promising Daria by Pi-Pa	Aldibara's	N06112/05	m	01.03.2005	N/N (free)
LB826	Hakuna C.	Bora z. Miloticek	CLP/L/3985	m	16.07.2007	N/N (free)
LB827	Ice-T	Yellows Garden	LOSH106136 1	m	20.03.2009	N/N (free)
LB828	Indira	Yellows Garden	LOSH106136 3	f	20.03.2009	N/N (free)

The diagnostic test was carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

Kind regards
